### Sommario

#### Aimetis Symphony™ Standard - IP Video Recording

Aimetis Symphony™ Standard is the ideal choice for organizations making a transition from analog CCTV or DVR technology to IP video, while looking to simplify the management of network video.

Leverage commercial off-the-shelf computers from leading manufacturers

Unlimited\* cameras per server

Edge Storage Support

Automated response to alarms (e.g. send email notification, start recording, etc.)

Remote Live View

Video Analytics Support

Continuous Recording on Motion or Alarm

Integrated Site Map

Multi-stream camera support

Mobile device support (iOS/Android)

Robust video management recording features:

Remote live view

Video playback

Record on motion

Integrated site map

PTZ control

Multi-stream camera support

\* The server requires 1 license per device. Ex: for a system with 32 cameras and one DIO device, you require 33 licenses. If you increase the number of managed devices, the licenses will also need to be increased.
